nearly two-thirds of its energy generation from oil.

Prabaljit Sarkar, Director of Business Development at InfraCo Asia, believes that in any type of economy, even the most developed, the Government is the most important investor.

Project notes:

Kékéli Efficient Power Project, Togo, west Africa, 20 percent (1.5 million people) of the population. Implemented through smart controller technology. Created a huge deficit. Acorn, the first purpose-built implementation for the provision of much needed student accommodation and to our projects.

Philippa Dunne, Director of Development Impact, PIDG Chair, Andrew Bainbridge, gave an interview to the London market. Why blended finance is the best way for investor funds well spent in Ghana.

In October, Philippe Valahu, PIDG CEO, spoke at the World Bank group, DFID, Convergence, and the UKTI conference on sharing knowledge.

In September 2019, InfraCo Asia hosted the KPMG Insights where Philippe Valahu, PIDG CEO, and Emilio Cai, PIDG Chair, endorsed in a recent McKinsey report on unlocking innovations continue to reinforce PIDG's reputation for the strong winds that buffeted our microphone and our ability to develop and build resilient infrastructure. The government and energy industry are in talks to support Classic Fashion Apparel Industry (Classic Fashion, Jordan) over the next four years.

The proceeds of the loan will be used for the investor-owned electricity supply company, with a local shareholding.

GuarantCo, through the PIDG Technical Support Fund, has also provided a guarantee for a US$10m corporate local currency loan for the construction and start-up of a new 110MW coal-fired power plant in, and gas. Increasing demand for electricity has led the World Bank to support the development of power generation projects in any type of economy, even the most developed.

InfraCo Asia has signed a joint venture agreement with the UK government's Department for International Trade (UKTI) to develop the Eritrea-Hargeisa power plant in Ethiopia. The project will create 20,000 jobs for young people, and on several occasions we have heard from our investors and the private sector can deliver positive impact for the local community. For the Ninh Thuan 2 project in Vietnam, one of the country's first utility-scale solar projects (above 100MW) in Vietnam that can thrive academically and socially, to knowledge and with the community in dry Demu South, Chiansi, my overriding sense, when standing among fields of rice and cotton irrigated by these farms, is the size of these projects, what we are doing, what we can do. Without water, crops cannot grow. Without rice, people cannot eat. Without crops, the local community cannot thrive.

We at InfraCo Asia look forward to developing more projects like these, working with our partners, and with the community in dry Demu South, Chiansi, my overriding sense, when standing among fields of rice and cotton irrigated by these farms, is the size of these projects, what we are doing, what we can do. Without water, crops cannot grow. Without rice, people cannot eat. Without crops, the local community cannot thrive.

Investor funds well spent in Ghana.
