As a PIDG initiative, InfraZamin's sponsors include PIDG companies and lends further support for InfraZamin's plans to develop the infrastructure financing market in Pakistan.

By investing alongside long-established export credit agencies (ECAs), the fund will address a key financing gap in the market, unlocking transactions and mobilising up to USD 5.6 of private capital for each dollar invested.

Catalytic funding will support Acre Impact Capital's strategic growth plans to launch a series of investment vehicles that will provide capital to small and medium-sized enterprises in the healthcare, agriculture, and education sectors. The fund will also support infrastructure development projects, including renewable energy, through its relationship with InfraCo Africa.

PowerGen, a member of the IFC Group, commissioned two new power plants in Sierra Leone and has partnered with the Government of Sierra Leone and Infraco Africa on this project. Speaking at one of the commissioning ceremonies, Femi Coker, the Country Director, mentioned that “PowerGen is proud to partner with the Government of Sierra Leone and Infraco Africa on this project. The power plants will enhance the country’s power grid by providing reliable and affordable energy to communities over the course of the year.”

The discussion will take place on: [Register now](https://www.powergen.com)

The discussion will explore the main challenges organisations in emerging markets face, and how they are achieving sustainable development through green and resilient infrastructure projects.

**Infraco Africa**
